EXHAUST TECHNOLOGY

Solutions for a **better world**

# Silentcap

In our moist climate the Silentcap provides optimum protection to your engine. It protects your engine against rain, hail or snow. Moreover, our rain caps are extremely silent.

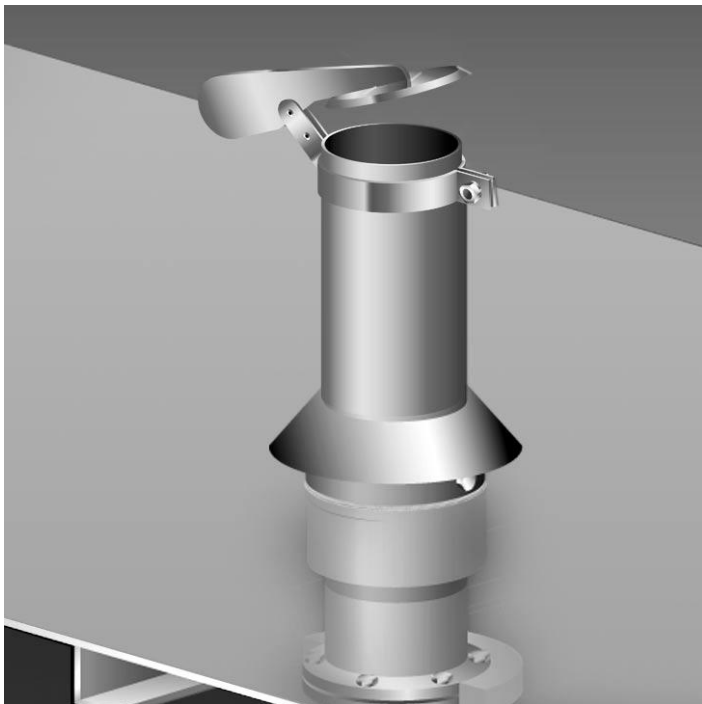

The Silentcap can be very easily and quickly mounted to minimal costs, it provides maximum protection while hardly any or no maintenance is required. Because of their great demand, virtually all types are available from stock.

## ***Mounting***

It is of importance that the lid can be opened fully without being obstructed. An opening that is too large causing insufficient gas speed will adversely affect its operation.

## ***Quality and safety***

Our manufacturing process from design to delivery is in conformity with the ISO 9001:2000 standard, for which we have been certified. Silentcaps are built-in components, therefore no CE marking applies. However you will have to indicate any potential danger, for example the risk of burns.

### Technical specifications

- Fully Stainless steel
- Low noise
- Perfectly balanced
- Maintenance free
- Durable
- Easy installation

### Dimensions

Model	Type NB	INCH	A (mm)	B (mm)	C (mm)	D (mm)
